Tbilisi, Georgia · r@revaz.dev · [@linkedin](#) · [@github](#) · revaz.dev

Results-driven software engineer with a proven track record of delivering high-quality, scalable, and maintainable solutions.

EXPERIENCE

Proxify, Stockholm, Sweden

April 2021 - Present

Senior Full Stack Engineer

- Became the driving force behind the development of numerous mission-critical features in collaboration with Bunji SAS, including a local calendar system, diverse campaign types for agencies to promote and convert visitors into customers, and cutting-edge visitor/user analytics capabilities. Additionally, played a key role in seamless Google integrations.
- Partnered with OnnoPlus GmbH to enhance their Onnox platform by introducing several innovative features, most notably a versatile campaign management system that empowers users to create and execute effective email, SMS, and QR code campaigns.
- Collaborated with the Pfizer engineering team to design and deliver a trailblazing web application for project XELJANZ, setting a new standard for user friendliness in the healthcare industry.

Esflow Technologies B.V., Amsterdam, Netherlands

October 2020 – April 2021

Full Stack Engineer

- Utilized React.js and Rebase to craft a visually striking and intuitive frontend for RentShark, incorporating domain-driven architecture that streamlined user interaction and enhanced overall user experience.
- Designed and developed a robust CRM system for Eredivisie clubs, leveraging TypeScript Next.js, Nest.js, PostgreSQL, and the YouTube JavaScript API. This comprehensive solution enables clubs to efficiently monitor and manage their video streaming presence across the popular video-sharing platform.

Circle Digital Agency, Tbilisi, Georgia

May 2018 – June 2020

Frontend Engineer

- Led the development and initial launch of a cutting-edge frontend for Hiring.ge, a startup owned by the company, utilizing React.js, styled-components, Emotion.js, and Redux to create visually stunning and highly functional web applications that brought UI/UX designs to life through reusable, quality code.
- Led multiple high-profile projects, demonstrating exceptional leadership and management skills, and consistently delivered innovative solutions that met or exceeded client expectations. Projects included Aptos, AptosCRM & Intranet, Kolkhida, Bioli, Shenia, and several others.

SKILLS

- Strong proficiency in Javascript and Typescript, including DOM manipulations, writing strongly- typed code.
- Thorough understanding and years of experience with React.js, Next.js, and Gatsby.js, along with state containers such as Redux.js and React Context API.
- Experience with RESTful APIs using Node.js, with express.js based frameworks like Feathers.js and Nest.js, also with laravel inspired framework - Adonis.js.
- Excellent comprehension of core concepts of common development tools such as npm and yarn for package management, webpack, vite, and parcel for build configuration and tooling (and also experience with gulp and grunt in the good old days).
- Familiarity with database management using PostgreSQL, MongoDB, MySQL with ORM's like TypeORM, Sequelize, Prisma, Mongoose.
- Experience with CI/CD using Github Actions, Netlify and Vercel.

EDUCATION

Business and Technology University, Tbilisi, Georgia

September 2018 – Feb 2019

Compute Science (BA)

After completing a semester of study, I decided to leave university to pursue opportunities that would allow me to apply my skills in a real-world setting, and to gain practical experience and build my professional portfolio, rather than continuing in an academic environment.

LANGUAGES

- Georgian (Native)
- English (Fluent)
- Russian (Limited Working Proficiency)
